

Responsive Behaviour Specialist — Retirement Homes

Hamilton Niagara Haldimand Brant
Behavioural Supports Ontario (BSO)

As a part of HNHB BSO strategy, the Responsive Behaviour Specialist supports residents with cognitive impairments and responsive behaviours* in registered retirement homes in **Hamilton & Burlington**.

How can the BSO Responsive Behaviour Specialist help?

The BSO Responsive Behaviour Specialist collaborates with clients, families, retirement home staff, and community partners to:

- Understand the triggers of, and strategies to manage responsive behaviours using information gained from comprehensive assessments, including standardized tools and unstandardized observations.
- Evaluate recommended strategies to inform the development of a care plan that enables safe and effective management of responsive behaviours in the retirement home setting.
- Recognize opportunities for other services to assist clients, and facilitate referrals as appropriate.
- Identify specific educational opportunities for retirement home staff around individual residents, and explore ways of meeting these educational needs.

***What are responsive behaviours?**

- Any behaviour that is in response to a real or perceived stimulus and may result in increased risk for the client or others.
- The behaviour may present a challenge to receiving appropriate care or co-existing with others.
- Responsive refers to the fact that many of these behaviours could respond to appropriate and timely interventions, and may be occurring as a result of an unmet need or desire that can no longer be communicated.
